

Thank you for your interest in AFFEW's Presentation Series **Benefits of Native Plant Gardening**. Below is the Zoom link. Also if you're interested, recorded presentations can be viewed on our [website](#).

Speaker: Garrett Noyes

Join us for an informative presentation on the benefits of adding native plants to your landscape. These amazing plants have adapted over centuries, making them easier to grow and beneficial for the birds, animals and other critters in your yard. They are better suited to handle extreme temperatures, diseases and pests in their local environment. They also adapt well to a variety of soil conditions with limited water. The best part, these beautiful plants continue to add to your landscape over time!

Time: May 4, 2021 07:00 PM America/Detroit
