

2023 Native Plant Sales – Garden Flats

Plants are available as mixed species, 38 cell garden flat trays. Flats come with a key and a basic planting plan. All flats must be ordered in advance.

Butterfly: A selection of host plants for several butterfly species found in Northern Michigan, including American Painted Lady, Dusky Wings, Dusted Skipper, Black Swallowtail, Karner Blue, Monarch and Primrose Moth. Also featuring important nectar plants for adults for early Summer through Fall.

Monarch: A mix of several Michigan native milkweeds for Monarch caterpillars, as well as vital nectar plants for adult butterflies from early Summer through Fall migration.

Pollinator: Michigan wildflower species selected to support a wide array of pollinators (wild bees, wasps, butterflies, moths and skippers) from Spring through Fall.

Tall Prairie: A mix of taller native bunchgrasses and wildflowers to provide height, color and robust habitat throughout the growing season.

Grassland: Native Michigan warm and cool season prairie grasses for season-long interest and a low maintenance native planting.

Shoreline: Designed for planting near the water's edge along Northern Michigan lakes and streams. A selection of native shoreline plants to provide erosion control, critical pollinator habitat as well as color and interest from Spring through Fall.

Rain Garden: Tailored for planting in designed Rain Gardens, these species are able to tolerate flooding during spring runoff or rain events, as well as drier conditions, all while providing wildlife habitat and a vibrant mix of blooms.

Semi-Shade: Perfect for planting in woodland settings featuring a mix of light sun and shade, featuring species to provide color and attract pollinators in Spring, Summer and Fall.
